

Support Seniors and People with Disabilities!

Congress is considering devastating cuts to the safety net programs that seniors and people with disabilities rely on to live independent, healthy lives at home and avoid more costly nursing facilities.

There's a better way to achieve savings!

On September 21st, New York advocates will join advocates from around the country to tell Washington to enact REAL Medicaid reform that not only contains costs but protects the civil rights of seniors and people with disabilities.

Please help me get to Washington!
(Small donations welcome.)
